## EDUCATION

### University Of Alberta

*Bachelor of Science in Computer Science, Minor in Business*

- **GPA: 3.8/4.0**

Edmonton, AB

*Sept. 2022 – Apr 2026*

## TECHNICAL PROJECTS

### Threat scanner | *Python, Yara, Urllib3* | [GitHub](#)

Aug 2024 – Present

- Developed a threat scanning tool in **Python** using Yara rules and a threat signature database to detect malicious files.
- Utilized **API** calls to retrieve detailed information on malicious files, reducing manual analysis time by **21%** and enabling quick remediation.
- Increased threat coverage by **45%** by automating the retrieval of over **800,000** threat signatures.
- Enhanced **scalability** by developing a **modular system** for plug-and-play integration of future threat intelligence sources.

### Brazmas | *Android Studios, Java, Figma, Firebase, UML* | [GitHub](#)

Jan 2024 – Apr 2024

- Developed an event check-in Android application in **Java** enabling real-time attendance and push notifications.
- Reduced redundant code by **31%**, by designing an **API** for communication between the Android client and the Firebase backend.
- Achieved **93%** test coverage by writing 60 unit tests with **JUnit** and 25 integration tests with **Espresso**, improving app stability by **28%**.
- Optimized **database queries** and Firebase interactions, reducing response times by **40%**, enhancing user experience during high-traffic events.

### Pomodoro timer Chrome Extension | *HTML, CSS, JavaScript, Git*

Jan 2024 – Mar 2024

- Created a Pomodoro timer Chrome extension, utilizing **HTML**, **CSS**, and **JavaScript**.
- Improved script simplicity by **15%** by utilizing `Chrome.storage` to cache user data and streamline timer state management, reducing reliance on persistent background scripts.

## EXTRA-CURRICULAR EXPERIENCE

### CTF Challenge Developer

Oct 2024 – Present

*Cybersecurity, Hacking and Digital Security Club*

*Edmonton, AB*

- Designed a **Python bytecode reverse-engineering** challenge. Forcing participants to reconstruct logic from `.pyc` files, to uncover a **code injection vulnerability**, solved by **36%** of teams.
- Directed event planning and coordination for a Capture the Flag event, resulting in a **50%** increase in sign-ups compared to the previous year.
- Increased average solve rate by **42%** by leading the development of 10 challenges across 5 categories, focusing on cohesive and engaging designs to enhance participant experience.

## CERTIFICATIONS

### elearn Junior Penetration Tester

May 2024 – Oct 2024

- Mastered penetration testing techniques by following the penetration testing methodology, conducting end-to-end assessments from **reconnaissance** to **reporting**.
- Worked with tools like **Nmap**, **Metasploit**, **BurpSuite**, **Netcat**, and **Wireshark** to perform assessments, identify vulnerabilities, and exploit weaknesses in network and system configurations.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, C, C#, HTML, CSS, RISC-V, SQL

**Frameworks/Tools:** Git, AWS, Pandas, Figma, MongoDB, Firebase, Junit, GitHub, Linux, Nmap, Espresso, Burpsuite, Metasploit, Wireshark, Netcat

**Relevant Coursework:** Operating Systems, Databases, Machine Learning, Object-Oriented Programming, Data Structures and Algorithms, and Software Engineering.
