EDUCATION

University Of Alberta

Edmonton, AB

Bachelor of Science in Computer Science, Minor in Business

Sep. 2022 – Apr 2026

- Operating Systems, Databases, Object Oriented Programming, Data Structures and Algorithms, and Software Engineering.

EXPERIENCE

Cybersecurity, Hacking and Digital Security Club | *Python, Git*

Oct 2024 – Present

- Collaborated with 14 club members to organize a Capture the Flag (CTF) competition with 300 projected participants, designed to enhance cybersecurity skills and introduce newcomers to the field.
- Created challenges across multiple difficulty levels, covering topics such as web exploitation, reverse engineering, and malware analysis, to engage participants of varying experience levels.
- Responsible for hosting the event and being prepared to answer all challenge-related questions, requiring in-depth knowledge of every problem and its solution.

PROJECTS

Melinoe | *Python, YARA, Git*

Aug 2024 – Present

- Developed a command line malware scanning tool in Python integrating YARA rules and a malware hash database to allow for file signature and function matching of malicious files.
- Automated retrieval of the latest threat signatures and malware hashes by piping data from MalwareBazaar's database, enabling real-time scanning and increasing malware detection rate by 35%.
- Enhanced signature scanning efficiency by 45% through the implementation of caching, significantly reducing processing time for both HTTP requests and repeated scans.

Brazmas | *Android Studios, Java, Figma, Firebase, Git, UML, XML*

Jan 2024 – Apr 2024

- Led a collaborative team of 6 to build an event check-in Android application in Java following the Agile method and the software development life cycle, including analyzing user requirements, creating UML diagrams, and engaging in test-driven development.
- Developed automated tests, including 30+ unit tests with JUnit and 15+ integration tests with Espresso, achieving 95% test coverage and improving app stability by 20%.
- Implemented seamless transitions between the event organizer and attendee roles, enhancing user convenience and reducing user navigation time by 40%.

Pomodoro timer Chrome Extension | *HTML, CSS, JavaScript, Git*

Jan 2024 – Mar 2024

- Directed a team of 3 in conceptualizing, designing, and implementing a Pomodoro timer chrome extension, utilizing HTML, CSS, and JavaScript.
- Utilized Chrome.storage to cache user data and improved timer state storing mechanism by streamlining background scripts and storage to increase script simplicity by 15%.

CERTIFICATIONS

eJPT (elearn Junior Penetration Tester) | *Nmap, Wireshark, Metasploit*

May 2024 – Oct 2024

- Mastered essential penetration testing techniques by following a structured methodology, conducting end-to-end assessments from reconnaissance to reporting, which sharpened problem-solving skills and ability to identify vulnerabilities in real-world systems.
- Employed advanced tools like Nmap and Wireshark to uncover active hosts, services, and vulnerabilities across network infrastructures, leading to a 30% increase in efficiency for identifying high-risk services like FTP, HTTP, SMB, SQL, and SSH.

TECHNICAL SKILLS

Languages: Python, Java, C, HTML, CSS, RISC-V, JavaScript, SQL

Frameworks/Tools: SQLite, JUnit, Git, GitHub, Android Studio, Figma, Excel, Linux, Firebase, Espresso, Wireshark, Nmap, MongoDB

Miscellaneous: OOP, Agile, UML, Penetration testing

Soft Skills: Creative thinking, Adaptability, Problem solving, Troubleshooting, Communication, Collaboration
